Career Objective

Enthusiastic Computer Science and Engineering (Data Science) undergraduate seeking an engineering position to apply my academic knowledge and problem-solving skills in a professional environment. Interested in learning new technologies, contributing to meaningful projects and growing through continuous learning and hands-on experience.

Education

B.Tech in Computer Science and Engineering (Data Science) Rajeev Gandhi Memorial College of Engineering and Technology, CGPA: 7.8/10	2023 – 2027 Nandyal
Diploma in Computer Science and Engineering Government Polytechnic College, 83.85%	2021 – 2024 Dharmavaram
Secondary School Certificate J.V.M.R.D.T High School, 95%	2021 Narasimpalli

Technical Skills

Programming Languages: Python, Java, C, C++

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems

Frameworks & Libraries: Pandas, Numpy, Scikit-learn, OpenCV, FastAPI

Databases: SQL, MongoDB

Tools & Platforms: Git, GitHub, AWS Cloud, TensorRT, NVIDIA Jetson AGX Orin, ROS 2, Tableau

Web Technologies: HTML, CSS, JavaScript

Projects

Real-Time Edge-AI Autonomous Navigation System

Developed a real-time autonomous navigation system using SegFormer-B0 semantic segmentation and YOLOv8 . Optimized inference on NVIDIA Jetson AGX Orin using TensorRT for low-latency edge deployment. Designed a vision-based navigation framework for drivable path estimation and dynamic obstacle avoidance. GitHub: github.com/challa-obulesh/semantic_segmentation_jetson

AI Professor Assistant – Telegram AI Agent

Developed a Telegram-based AI assistant to automate communication between students and professors.

FitAI Pro – AI-Powered Fitness and Nutrition Assistant

Developed an AI-powered fitness application using computer vision and nutrition analysis.

Implemented meal calorie estimation, workout planning, and personalized fitness recommendations.

Designed interactive dashboards using Plotly and built the application using Streamlit.

GitHub: github.com/challa-obulesh/fitai-pro

Internship Experience

Research Intern – Edge AI and Computer Vision

SDV Murthy Lab, GITAM School of Technology

May 2026 – Jul 2026

Bengaluru, India

Developed a real-time Edge-AI autonomous navigation system using SegFormer-B0 semantic segmentation and YOLOv8 object detection.

Optimized inference on NVIDIA Jetson AGX Orin using TensorRT for real-time edge deployment.

Implemented and evaluated vision-based navigation for drivable path estimation and dynamic obstacle avoidance.

Co-authored an IEEE conference paper based on the developed system and published the implementation on GitHub.

Publications

Real-Time Edge-AI-Based Autonomous Navigation Using Dual-Model Vision Fusion

IEEE Conference

Under Review

2026

Co-authored a research paper proposing a real-time Edge-AI autonomous navigation framework using SegFormer-B0 semantic segmentation and YOLOv8 object detection for deployment on the NVIDIA Jetson AGX Orin platfor

Certifications

AWS Certified Cloud Practitioner

Google Analytics Certification

Mar 2025 – Mar 2028

Feb 2025 – Feb 2026
